

Stevial **BLEND**

WHY a Blend?

Stevial Blend is dedicated to help the dosing of steviol glycosides for industrial applications, with a mix of steviol glycosides and other ingredients: Sugar, Erythritol, Maltodextrine...

Stevial Blend uses a technology to bind the steviol glycosides to the other phase of the mix, avoiding a separation due to different density or granulation.

In some FORMULATION Stevial Blend enables to offset in terms of volume, weight or technology the substitution of sugar by steviol glycosides.

**CALORIE
0 SWEETENER
100% NATURAL

100% FRENCH
ORIGIN**

**STEVIAL BLEND is a PRODUCT 100% FRENCH,
WITH STEVIOL GLYCOSIDES PRODUCED IN AUVERGNE,
a FULL TRACEABILITY AND a QUALITY RECOGNIZED
BY MANY CUSTOMERS.**

Stevial Blend is a preferred product for many industrials, where in their applications the substitution of sugar by only steviol glycosides is not enough to give the right finished product.

DIFFERENT INGREDIENT MIXES DEPENDING ON YOUR INDUSTRIALS NEEDS (XYLITOL, ERYTHRITOL, MALTODEXTRINE, INULINE, AGAVE...).

DIFFERENT OPTIONS OF STEVIA EXTRACT: Reb A 60, Reb A 98...

DIFFERENT DOSES OF STEVIOL GLYCOSIDES TO ADJUST THE SWEETENING POWER: 1, 2 even 5 TIMES MORE THAN SUGAR !

Examples of products already available in our **Stevial Blend** range:

- Mix of Erythritol and Stevial Reb A 60
- Possible doses: 1, 2, 3 to 5 times the sweetening power of sugar

- Mix of sugar and Stevial Reb A 60
- Possible doses: 1, 2, 3 to 5 times the sweetening power of sugar

WHY ERYTHRITOL? IT IS THE ONLY BULKING AGENT KNOWN TO BE 0 CALORIE, MAKING POSSIBLE TO OBTAIN A PRODUCT EASY TO DOSE IN SMALL QUANTITIES, CALORIE FREE. OTHER BULKING AGENTS SUCH AS XYLITOL, SORBITOL, MALTODEXTRINES, INULINE... ALL HAVE A CALORIC VALUE.
